

## go bhaarati Implements iDempiere-based ERP Solution to Automate and Streamline their Core Financial Business Processes

### Customer Name

go bhaarati

### Industry

Organic food

### Location

Hyderabad, India

### Services

go bhaarati deals with supply of organic food grains such as millets, staples, spices and so on thus promoting a healthy living

### Website

<https://gobhaarati.com/>

## Challenges

- Their core business processes such as financials, inventory management, purchasing, sales and shipments were completely disintegrated and scattered
- There was absence of an automated and integrated financial management system
- Due to disparate systems, they lacked visibility to business information hence decision making and performance management was not up to the mark

## Solution

- Triniti, with its open source enterprise consulting expertise, moved their accounting processes from Tally onto iDempiere and implemented inventory management, procurement, sales and financial management modules
- An enhanced reporting framework was provided using Triniti's e-Worksheets software
- Order booking, shipping and receivable management processes have been streamlined and configured using iDempiere, thus simplifying their sales process
- Modern inventory management practices have also been enforced thereby reducing expired and obsolete inventory

## Results

- Consistent application of business rules across the product data. This has standardized data creation processes from concept to production stages, to streamline product master data and maintaining single source of truth across systems
- Enhanced visibility into key data has improved the decision making process of the stakeholders/management
- With data available on a single application, collaboration across departments have smoothed, thereby removing silos

## Triniti's Value Add

- \* Integration of overall business functions
- \* Improved visibility
- \* Single source of truth across systems
- \* Standardized business processes
- \* Enhanced collaboration across departments
