

TRINITI Adds a New Client in Engineering and Power Sector with the Implementation of Open Source ERP Application

Leveraging its expertise in open source applications, Triniti would be assisting **APT Power Engineering Ltd**, a leading provider in engineering and power solutions, with the implementation of **iDempiere ERP**.

- ✓ Multiple modules including Procurement, Finance, Inventory & Project Expense Management would be implemented to streamline various business processes. Triniti will also integrate **eWorksheet**, an in-house tool, with iDempiere ERP, to create custom reports and interfaces to manage tools at project sites for APT
- ✓ This implementation is aimed to improve the efficiency of project lifecycle management and utilization of tools at various project sites, enabling overall organizational visibility
